

Naan Mudhalvan
Salesforce Developer(Course)
Assignment No 1

Name : Dinesh S

Naan Mudhalvan id : au611220205701
Year & Dep : 4th year & IT

Batch : 2024
Zone no : Zone 8

1.Create a Master-Detail Relationship between two Custom objects and also create a Roll Up Summary Field to Calculate total number of records.

Solution:

Step 1: Create Custom Objects

Assuming you have two custom objects, let's call them "College_C" and "C Department_C". If you haven't already created these objects, you can do so by going to Setup > Object Manager > Create > Custom Object.

The screenshot shows the Salesforce Setup interface with the following details:

- Header:** Search bar with "Search Setup", a gear icon, and other navigation links.
- Page Title:** SETUP / New Custom Object
- Section: Custom Object Definition Edit**
 - Custom Object Information:** Singular Label: "College", Plural Label: "Colleges", Starts with vowel sound:
 - Object Name:** Object Name: "College", Example: "Account".
 - Description:** A large text area for description.
 - Context-Sensitive Help Setting:** Open the standard Salesforce.com Help & Training window (radio button selected).
 - Content Name:** None
- Section: Enter Record Name Label and Format**
 - Record Name:** Record Name: "College Name", Example: "Account Name".
 - Data Type:** Text (dropdown menu).
- Section: Optional Features**
 - Allow Reports
 - Allow Activities
 - Track Field History
 - Allow in Chatter Groups
 - Enable Licensing
- Section: Object Classification**
 - When these settings are enabled, this object is classified as an Enterprise Application object. When these settings are disabled, this object is classified as a Light Application object. [Learn more](#).
 - Allow Sharing
 - Allow Bulk API Access
 - Allow Streaming API Access
- Section: Deployment Status**
 - In Development
 - Deployed
- Section: Search Status**
 - When this setting is enabled, your users can find records of this object type when they search. [Learn more](#).
 - Allow Search
- Section: Object Creation Options (Available only when custom object is first created)**
 - Add Notes and Attachments related list to default page layout
 - Launch New Custom Tab Wizard after saving this custom object
- Buttons:** Save, Save & New, Cancel.

Second custom objects, let's call them "Department_C"

The screenshot shows the Salesforce Setup interface under the Object Manager tab. A message at the top indicates that permissions for the object are disabled by default. The 'Custom Object Definition Edit' page is displayed, with the 'Label' field set to 'Department' and the 'Plural Label' field set to 'Departments'. The 'Object Name' field also contains 'Department'. Other settings include 'Text' as the data type and 'None' as the content name. The 'Record Name Label and Format' section shows 'Department Name' as the record name and 'Text' as the data type. The 'Optional Features' section has several checkboxes like 'Allow Reports' and 'Enable Licensing' unchecked. The 'Object Classification' section has checkboxes for 'Allow Sharing', 'Allow Bulk API Access', and 'Allow Streaming API Access' all checked. The 'Deployment Status' section shows 'Deployed' selected. The 'Search Status' section has 'Allow Search' unchecked. The 'Object Creation Options' section has two checkboxes: 'Add Notes and Attachments related list to default page layout' and 'Launch New Custom Tab Wizard after saving this custom object', both unchecked. At the bottom are 'Save', 'Save & New', and 'Cancel' buttons.

Step 2: Create a Master-Detail Relationship

To create a Master-Detail relationship between these two custom objects, follow these steps:

1. Go to Setup > Object Manager.
2. Click on "College__c" to open its settings.
3. In the left sidebar, click on "Fields & Relationships."
4. Click the "New" button to create a new custom field.
5. Choose "Master-Detail Relationship" as the data type.
6. Enter a label for the relationship, e.g., "Department __c."
7. Choose "Department__c" as the related object.
8. Configure other settings as needed and click "Next."
9. Specify the field-level security and add it to relevant page layouts.
10. Click "Next" and "Save" to create the relationship

The screenshot shows the Salesforce Object Manager interface for the 'department' object. The top navigation bar includes 'Setup', 'Home', and 'Object Manager'. The main header says 'SETUP > OBJECT MANAGER' and 'department'. On the left, a sidebar lists various configuration tabs: Details, Fields & Relationships, Page Layouts, Lightning Record Pages, Buttons, Links, and Actions, Compact Layouts, Field Sets, Object Limits, Record Types, Related Lookup Filters, Restriction Rules, Scoping Rules, Triggers, Flow Triggers, and Validation Rules. The 'Fields & Relationships' tab is selected. The main content area is titled 'Details' and contains fields for API Name ('department__c'), Singular Label ('department'), and Plural Label ('departments'). It also includes sections for Description, Enable Reports, Track Activities, Track Field History, Deployment Status ('Deployed'), Help Settings, and a link to 'Standard salesforce.com Help Window'. At the bottom right are 'Edit' and 'Delete' buttons.

The screenshot shows the 'New Relationship' step in the Salesforce Object Manager for the 'department' object. The top navigation bar is identical to the previous screenshot. The main header says 'SETUP > OBJECT MANAGER' and 'department'. The left sidebar shows the 'Fields & Relationships' tab is selected. The main content area is titled 'New Relationship' and 'Step 6 of 6'. It displays a configuration for a Master-Detail relationship named 'collage'. The 'Field Label' is 'collage', 'Data Type' is 'Master-Detail', and 'Field Name' is 'collage'. A note says 'Specify the title that the related list will have in all of the layouts associated with the parent.' The 'Related List Label' is set to 'departments'. Below this, it says 'These are the page layouts that will include this field. Because this is a Master-Detail relationship, the field is required.' Under 'Add Related List', there is a list box containing 'collage Layout' with a checked checkbox. There is also a checked checkbox for 'Append related list to users' existing personal customizations'. At the bottom right are 'Previous', 'Save & New', 'Save', and 'Cancel' buttons.

FIELD LABEL	FIELD NAME	DATA TYPE	CONTROLLING FIELD	INDEXED
collage	collage_c	Master-Detail(collage)		✓
Created By	CreatedById	Lookup(User)		
department Name	Name	Text(80)		✓
Last Modified By	LastModifiedById	Lookup(User)		

Step 3: Create the Roll-Up Summary Field

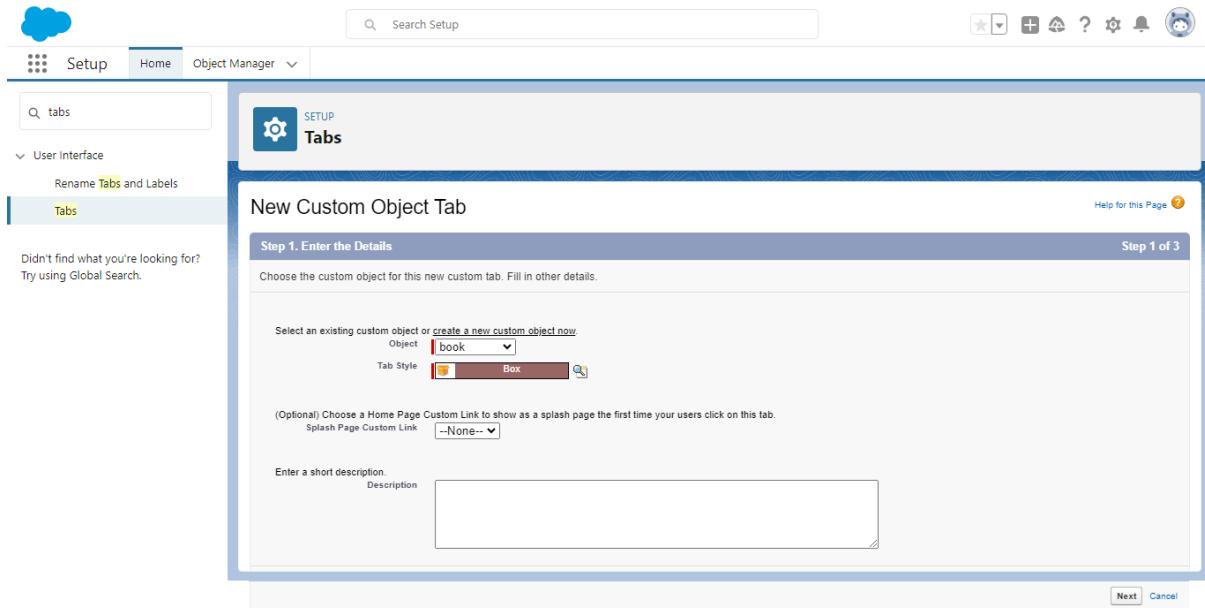

Now, let's create a Roll-Up Summary Field on the "College_C" to calculate the total number of related records in "Department__C":

1. Still on the "College_c" settings, go to "Fields & Relationships."
2. Click the "New" button to create a new custom field.
3. Choose "Roll-Up Summary" as the data type.
4. Enter a label for the field, e.g.,
5. Choose "Count" as the Roll-Up Type.
6. Select " Department__c" as the object to roll up information from.
7. Specify the filter criteria if you want to filter the related records.
8. Configure other settings as needed and click "Next."
9. Specify the field-level security and add it to relevant page layouts.
10. Click "Next" and "Save" to create the Roll-Up Summary Field.

The screenshot shows the Salesforce Setup interface with the 'Object Manager' selected. A sidebar on the left lists various setup categories under 'Fields & Relationships'. The main content area is titled 'New Custom Field' and is on 'Step 5 of 5'. The field being configured is named 'total count' with a data type of 'Roll-Up Summary'. The 'Page Layouts' section is open, showing 'collage Layout' selected. Buttons at the bottom include 'Previous', 'Save & New', 'Save', and 'Cancel'.

The screenshot shows the Salesforce Setup interface with the 'Object Manager' selected. A sidebar on the left lists various setup categories under 'Fields & Relationships'. The main content area displays a table of fields for the 'collage' object. The table includes columns for FIELD LABEL, FIELD NAME, DATA TYPE, CONTROLLING FIELD, and INDEXED. The fields listed are:

FIELD LABEL	FIELD NAME	DATA TYPE	CONTROLLING FIELD	INDEXED
collage Name	Name	Text(80)		✓
Created By	CreatedBy	Lookup(User)		
Last Modified By	LastModifiedBy	Lookup(User)		
Owner	OwnerId	Lookup(User,Group)		✓
total count	total_count_c	Roll-Up Summary (COUNT department)		

Step 4: Create a Lightning App

1. Type and select "App Manager."
2. Click "New Lightning App."
3. Fill in basic information (Name, Developer Name, Description).
4. Choose the App Type (Standard, Console, Custom).
5. Customize the Logo and Colour Scheme.
6. Configure Navigation Items (objects to appear in the app's menu).
7. Set the App Visibility (default access).
8. Optionally, choose Record Pages (Lightning Record Pages).
9. Review and Save the app.

10. Assign the app to users or profiles.

11. Test the app with the assigned users.

New Lightning App

The screenshot shows the Salesforce Setup interface with the 'Tabs' page selected. The 'Custom Tabs' section is active, displaying a table of custom object tabs. The table has columns for Action, Label, Tab Style, and Description. The tabs listed are:

Action	Label	Tab Style	Description
Edit Del	books	Box	
Edit Del	colleges	Heart	
Edit Del	departments	Building	
Edit Del	students	Diamond	

Below this are sections for 'Web Tabs', 'Visualforce Tabs', 'Lightning Component Tabs', and 'Lightning Page Tabs', each with a note indicating no items have been defined.

Conclusion:

Now, whenever you create or update a record in the "Department__c" related to a "College__c," the "TotalCount__c" field on the "College__c" will automatically update to show the total number of related records.

Remember to adjust field-level security, validation rules, and page layouts as needed to ensure that your custom objects and fields are appropriately configured for your organization's requirements.

The screenshot shows a browser window with a Salesforce Lightning record creation dialog. The dialog is titled 'New college' and is for the 'college' object. It contains the following fields:

- Information
 - college Name: kiot
 - phone: 9087116402
 - Email: kiot@ac.in
 - Location
 - Latitude: 90
 - Longitude: 80
- Owner: krishna s

At the bottom of the dialog are 'Cancel', 'Save & New', and 'Save' buttons. The background shows a list of colleges with a 'Recently Viewed' section.

You haven't viewed any Bank recently.
Try switching list views.

Step 2:

Permission Sets:

- Create two permission sets, one for User A and one for User B.

Object-Level Security:

- In each profile and permission set, set the object-level security for the Account object to "Read" to ensure that both User A and User B can view Account records.

Record-Level Security:

- Implement record-level security using Criteria-Based Sharing Rules.
- Create a sharing rule that shares Account records owned by User A with User A and records owned by User B with User B.
- For the sharing rule criteria, specify that records owned by User A are shared with User A, and records owned by User B are shared with User B.

Ownership:

- Ensure that the Account records are owned by the respective users, with User A owning their records and User B owning their records.

Organization-Wide Defaults:

- Set the organization-wide defaults for the Account object to "Private" to ensure that records are private by default.

Testing:

- Test the setup by logging in as User A and User B separately to verify that they cannot

access each other's records.

The screenshot shows the Salesforce 'Permission Sets' page within the Setup interface. The left sidebar is collapsed, showing sections like 'User Management Settings', 'Feature Settings', 'Data.com', 'Service', 'Embedded Service', and 'User Interface'. The main content area is titled 'Permission Sets' and contains a table listing various permission sets. The table columns are 'Action', 'Permission Set Label', 'Description', and 'License'. One row is highlighted with a blue background, indicating it is selected. The 'Description' column for this row states: 'Allows access to supervisor features in Service Cloud Voice contact centers th...'. The 'License' column indicates it is associated with the 'Salesforce' license.

The screenshot shows the Salesforce Setup interface under the Object Manager tab. A message at the top indicates that permissions for the object are disabled by default. The 'Custom Object Definition Edit' page is displayed, with the 'Label' field set to 'Department' and the 'Plural Label' field set to 'Departments'. The 'Object Name' field also contains 'Department'. Other settings include 'Record Name' as 'Department Name', 'Data Type' as 'Text', and various optional features like 'Allow Reports' and 'Allow Activities' checked. The 'Object Classification' section has 'Allow Sharing', 'Allow Bulk API Access', and 'Allow Streaming API Access' checked. The 'Deployment Status' is set to 'Deployed'. The 'Search Status' is enabled. Under 'Object Creation Options', 'Add Notes and Attachments related list to default page layout' is checked. At the bottom, there are 'Save', 'Save & New', and 'Cancel' buttons.

Step 4

Now you can preview your created profile on the profile option here my profile name venkat has been created with the access of read,create,edit along with view on it

Action	Profile Name	User License	Custom
<input type="checkbox"/> Edit Del ...	venkat	Analytics Cloud Integration User	<input checked="" type="checkbox"/>
<input type="checkbox"/> Edit Del ...	venkatt	Analytics Cloud Integration User	<input checked="" type="checkbox"/>

Step 5:

Now create two users by enter into the Setup-quick search[user] and then click on new user after clicking that you need to create two user along with the profile as Jaga which we have created on the step 2.once the one user has been created click on the save&new so that you can create the second user and there the user name can been created with alternate name but with the same user profile and once the two user are create click on save.

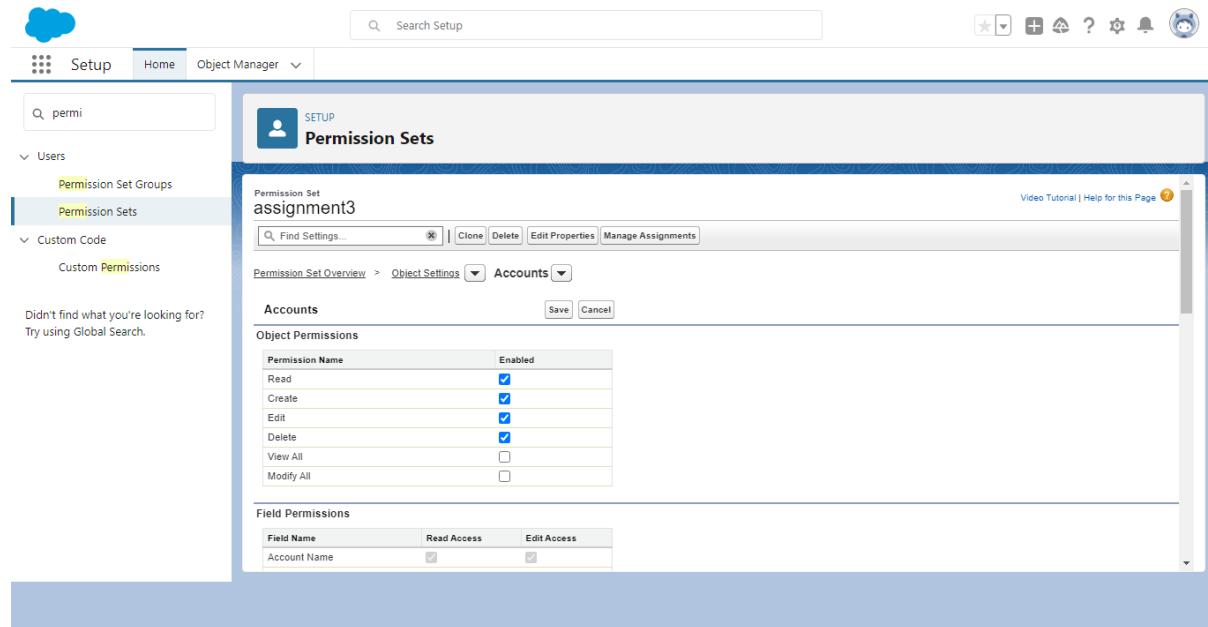

Action	Full Name	Alias	Username	Role	Active	Profile
<input type="checkbox"/> Edit	Chatter Expert	Chatter	chaty_00d500000cifheavffeloywicndx@chatter.salesforce.com		<input checked="" type="checkbox"/>	Chatter Free User
<input type="checkbox"/> Edit	S_DharunKumar	Dharun	2k20i56@kiot.ac.in		<input checked="" type="checkbox"/>	Work.com Only User
<input type="checkbox"/> Edit	S_Venkatesan	VS	venkatesans@aaannmudalvan.com		<input checked="" type="checkbox"/>	System Administrator
<input type="checkbox"/> Edit	S_Venkatesan	venky	2k20i43@kiot.ac.in		<input checked="" type="checkbox"/>	Work.com Only User
<input type="checkbox"/> Edit	User_Integration	integ	integration@00d500000cifheav.com		<input checked="" type="checkbox"/>	Analytics Cloud Integration User
<input type="checkbox"/> Edit	User_Security	sec	insightsecurity@00d500000cifheav.com		<input checked="" type="checkbox"/>	Analytics Cloud Security User

Now you can preview your two user that you have created in my side I had create the two users a Jagadesh11 and Jagadesh22 as a director channel sales with the marketing team.

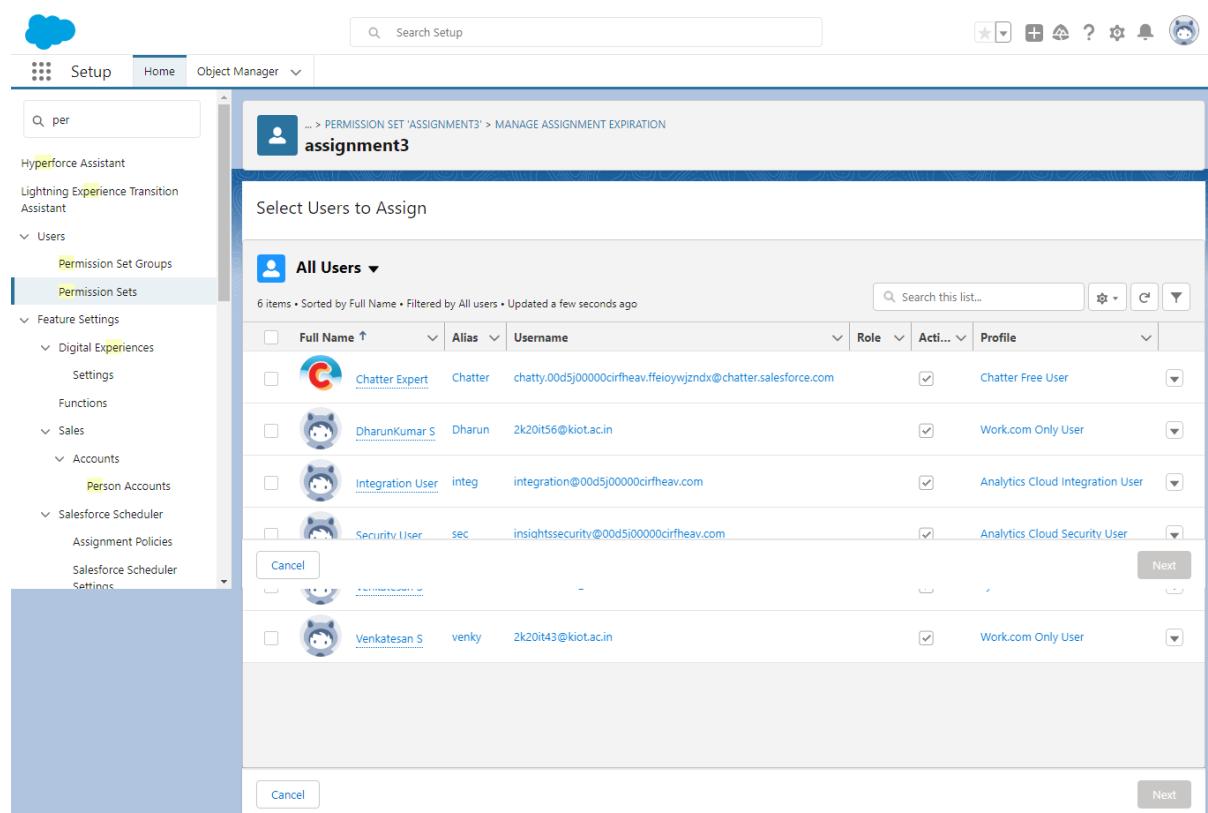

Step 6:

Now the two user as been created with the profile so that two user can perform the Create, Read, Edit and view on both the user. So as per the given task we need to allocate a specific access as delete on one user for that we need create a permission set for one user so it can created as

setup-quick search[permission set]-new-fill label name [auto select the API name]-click on save-object settings-accounts.

The screenshot shows the Salesforce Setup interface. In the left sidebar, under 'Users', 'Permission Sets' is selected. A new permission set named 'assignment3' is being created. The 'Accounts' tab is active, displaying object permissions for various actions like Read, Create, Edit, Delete, View All, and Modify All. The 'Field Permissions' section is partially visible below. The top navigation bar includes 'Search Setup' and various icons.

The screenshot shows the 'Select Users to Assign' screen for the 'assignment3' permission set. The 'All Users' filter is applied, showing a list of users with checkboxes next to their names. The list includes Chatter Expert, DharunKumar S, Integration User, Security User, and Venkatesan S. The top navigation bar includes 'Search Setup' and various icons.

... > PERMISSION SET 'ASSIGNMENT3' > MANAGE ASSIGNMENT EXPIRATION
assignment3

Select an Expiration Option For Assigned Users

All Users

Full Name ↑	Alias	Username	Role	Acti...	Profile
Chatter Expert	Chatter	chatty.00d5j00000cirfheav.ffeiywzndx@chatter.salesforce.com	<input checked="" type="checkbox"/>	Chatter Free User	<input type="button" value="▼"/>
DharunKumar S	Dharun	2k20it56@kiot.ac.in	<input checked="" type="checkbox"/>	Work.com Only User	<input type="button" value="▼"/>
Integration User	integ	integration@00d5j00000cirfheav.com	<input checked="" type="checkbox"/>	Analytics Cloud Integration User	<input type="button" value="▼"/>
Security User	sec	insightssecurity@00d5j00000cirfheav.com	<input checked="" type="checkbox"/>	Analytics Cloud Security User	<input type="button" value="▼"/>
Venkatesan S	venky	2k20it43@kiot.ac.in	<input checked="" type="checkbox"/>	Work.com Only User	<input type="button" value="▼"/>

Step 8

Now click on add assignment there you will find your two created users click on any one user to give a special access as delete on it and then click on assign so that the specific selected user can have a special access as delete on it.

... > PERMISSION SET 'PERMISSION12' > MANAGE ASSIGNMENT EXPIRATION
permission12

Select Users to Assign

All Users

Full Name ↑	Alias	Username	Role	Active	Profile
Jagadesh S	JS	w0w@gmail.com	SF Admin	<input checked="" type="checkbox"/>	System Administrator
Jagadesh S	JS	jega1117@gmail.com	Channel Sales Team	<input type="checkbox"/>	Standard Platform User
<input checked="" type="checkbox"/> Jagadesh11 S	js	jwv123@gmail.com	Director, Channel Sales	<input checked="" type="checkbox"/>	Jaga
Jagadesh22 S	js	jaat1@gmail.com	Marketing Team	<input checked="" type="checkbox"/>	Jaga

Now click on Assign.

The screenshot shows the Salesforce Setup interface. The left sidebar has a tree view with nodes like Setup Home, Service Setup Assistant, Multi-Factor Authentication Assistant, Hyperforce Assistant, Release Updates, Lightning Experience Transition Assistant, Salesforce Mobile App, Lightning Usage, Optimizer, ADMINISTRATION, and Users. Under Users, 'Permission Sets' is selected. The main content area is titled 'Current Assignments' and shows a table with one row:

Full Name	Active	Role	Profile	User License	Expires On
Venkatesan S	✓		System Administrator	Salesforce	

Now the specific access for the venkatesan s user has been assigned successfully.

4.Create a screen flow for a basic survey to fill in the details for any form.

Solution:

Step 1: Create a Custom Object

The next step is to create a custom object **Survey Result** and a few custom fields to store survey responses.

1. Click **Setup**.
2. In the Object Manager, click **Create | Custom Object**.
3. Now create a custom object **Survey Result** and fields as shown in the screenshot below:
4. Click **Save**.

Fields & Relationships

FIELD LABEL	FIELD NAME	DATA TYPE	CONTROLLING FIELD	INDEXED
Comment	Comment_c	Text Area(255)		
Created By	CreatedById	Lookup(User)		
Email	Email_c	Email		
Last Modified By	LastModifiedById	Lookup(User)		
Name	Name_c	Text(125)		
Owner	OwnerId	Lookup(User,Group)	✓	
Rating	Rating_c	Picklist		
Survey result Name	Name	Text(80)	✓	

Step 2: Create a Thank You For Survey Lightning Email Template

1. Click **App Launcher**.
2. In the Quick Find box, type **Email Templates**.
3. Clicks on the **New Email template** button.
4. **Name the Lightning Email Template** and make sure to store it in the **Public Email Templates** folder.
5. Create a template like the following screenshot.

Email Template
Thank you Email - Survey

Information

- Email Template Name: Thank you Email - Survey
- Description:
- Related Entity Type: Service Contract
- Folder: Private Email Templates

Message Content

Subject: Thank you for completing our survey !

Enhanced Letterhead:

```
Hi {{survey_results_c.Name_c}},  
Thanks for taking time out to participate in our survey, we are very appreciative of the time you have taken to assist in our analysis, and commit to utilizing the information gained to contemplate and implement.
```

Additional Information

Created By: Venkatesan S, 03/10/2023, 2:25 pm

Last Modified By: Venkatesan S, 03/10/2023, 2:25 pm

Step 3: Create an Email Alert

1. Click **Setup**.
2. In the Quick Find box, type **Email Alerts**.
3. Select **Email Alerts**, click on the **New Email Alert** button.
4. Name the **Email Alert** and click the Tab button. The **Unique Name** will populate.
5. For **Object** select **Survey Result**.
6. For the **Email Template** chooses **Lightning Email Template Thank You Email – Survey**.
7. For **Recipient Type** select **Email Field: Email**.
8. Click **Save**.

Step 4.1: Salesforce Flow — Create a Screen that Allow Users to Fill Survey

1. Click **Setup**.
2. In the Quick Find box, type **Flows**.
3. Select **Flows** then click on the **New Flow**.
4. Select the **Screen Flow** option and click on **Next** and configure the flow as follows:
 1. **How do you want to start building: Freeform**
5. We will use the **Screen** element to capture a **Survey response** form. Drag and drop a **Screen** element onto the canvas.

Step 4.2: Salesforce Flow — Add a Record Creates Element to Save Survey Response

1. Drag-and-drop the **Create Records** element onto the Flow designer.
2. Enter a name in the **Label (Save Response)** field; the **API Name** will auto-populate.
3. For **How Many Records to Create** – select **One**.
4. For **How to Set the Record Fields** – select **Use separate resources, and literal values**.
5. Select the **Survey_Result__c** object from the dropdown list.
6. **Set Field Values for the Survey Result**
 1. Row 1:
 1. **Field: Comment__c**
 2. **Value: {!Comment}**
 2. Click **Add Row**
 3. Row 2:

1. **Field: Email__c**
2. **Value: {!Email.value}**
4. Click **Add Row**
5. Row 3:
 1. **Field: Name__c**
 2. **Value: {!Name.firstName} {!Name.lastName}**
6. Click **Add Row**
7. Row 3:
 1. **Field: Rating__c**
 2. **Value: {!Rating}**
7. Click **Done**.

Edit Create Records

Create Salesforce records using values from the flow.

*Label *API Name

Save Response	Save_Response
---------------	---------------

Description

How Many Records to Create

- One
- Multiple

How to Set the Record Fields

- Use all values from a record
- Use separate resources, and literal values

Create a Record of This Object

*Object Survey Result

Set Field Values for the Survey Result

Field	Value
Comment__c	← A_a Comment X
Email__c	← A_a Email > Value X
Name__c	← {!Name.firstName} {!Name.lastName}
Rating__c	← A_a Rating X

+ Add Field

Manually assign variables

Cancel Done

Step 4.3: Salesforce Flow — Call an Action — Email Alert to Send Out Thank You Email

The next step is to call the **Survey – Thank You Email** email alert from flow so that when flow fires it triggers the thank you email to survey participants.

1. Under **Toolbox**, select **Element**.
2. Drag-and-drop **Action** element onto the Flow designer.
3. In the **Action** box, type **Survey – Thank You Email**.
4. Clicks on the **Survey – Thank You Email** email alert.
5. Click **Done**.

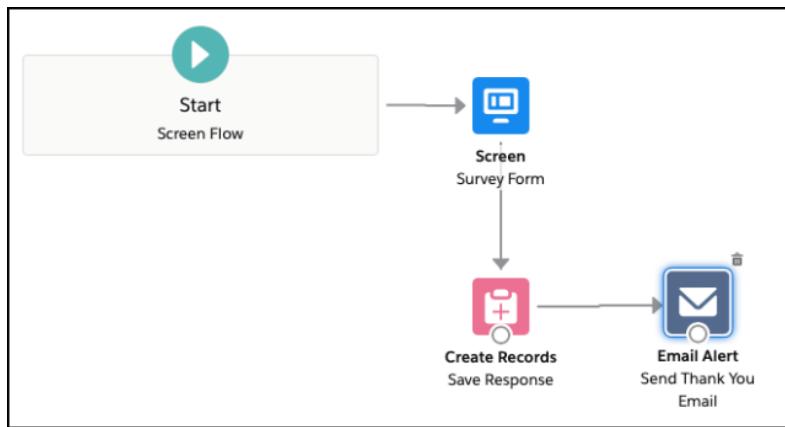

Edit "Survey - Thank You Email" email alert

Use values from earlier in the flow to set the inputs for the "Survey - Thank You Email" email alert. To use its outputs later in the flow, store them in variables.

* Label	* API Name
Send Thank You Email	Send_Thank_You_Email
Description	
<pre>-----</pre>	
Set Input Values	
A_a * Record ID	{!Save_Response}

Cancel **Done**

In the end, Sergio's **Flow** will look like the following screenshot:

1. Click **Save**.
2. Enter **Flow Label** the **API Name** will auto-populate.
3. Click **Show Advanced**.
4. **How to Run the Flow: User or System Context—Depends on How Flow is Launched**
5. **Type: Screen Flow**
6. **API Version for Running the Flow: 51**
7. **Interview Label: Survey {!\$Flow.CurrentDateTime}**
8. Click **Save**.

Cancel **Save**

Step 5: Create a Lightning Application to Render Lightning Runtime for Flow in a Visualforce Page

Now we will create a Lightning Application that declares a dependency on the **lightning:flow** component.

1. Click **Setup | Developer Console**
2. Navigate to **File | New | Lightning Application**
3. Enter a **Name (VFPageToLC)** field, make sure to select the **Lightning Out Dependency App** checkbox.
4. Click **Submit**.
5. Copy code from [GitHub](#) and paste it into your Lightning Application.
6. **Save** your code.

The screenshot shows the Salesforce IDE interface with the following details:

- Toolbar:** File, Edit, Debug, Test, Workspace, Help.
- Tab:** VFPageToLC.app *
- Code Editor:** Displays the following Apex code:

```
1 <aura:application access="global"
2             extends="ltng:outApp"
3             implements="ltng:allowGuestAccess">
4     <aura:dependency resource="lightning:flow"/>
5 </aura:application>
```
- Bottom Bar:** Logs, Tests, and Problems

Step 6: Create a Visualforce Page and Embed Your Flow Into It

Now we will create a Lightning Application that declares a dependency on the **lightning:flow** component.

Add the Lightning Components for Visualforce JavaScript library to your Visualforce page using the `<apex:includeLightning/>` component. In the Visualforce page, reference the dependency app. Then write a JavaScript function that creates the component on the page using `$Lightning.createComponent()` Click Setup.

1. In the Quick Find box, type **Visualforce Pages**.
2. Clicks on the **New** button.
3. Copy code from [GitHub](#) and paste it into your visualforce page
4. Click **Save**.

The screenshot shows the Visualforce Page Editor for a page named 'Survey'. The 'Page Information' section includes fields for Label ('Survey'), Name ('Survey'), and Description. It also has checkboxes for 'Available for Lightning Experience, Experience Builder sites, and the mobile app' (checked) and 'Require CSRF protection on GET request' (unchecked). Below this is the 'Visualforce Markup' tab, which displays the following Apex code:

```

<apex:page showheader="false" lightningStylesheets="true">
<html>
<head>
<apex:includeLightning />
<!--Use apex:includeLightning to add the Lightning Components for Visualforce JavaScript library to your Visualforce page-->
</head>
<body class="slds-scope">
<div id="flowContainer" />
<script>
var statusChange = function (event) {
    if(event.getParam("status") === "FINISHED") {
        var outputVariables = event.getParam("outputVariables");
        var key;
        for(key in outputVariables) {
            if(outputVariables[key].name === "myOutput") {
                // Do something with myOutput
            }
        }
    }
};
$Lightning.use("c:VFPageToLC", function() {
    $Lightning.createComponent("lightning:flow", {"onstatuschange":statusChange},
    "flowContainer",
    function (component) {
        component.startFlow("Survey");
    }
));
</script>
</body>

```

Step 7: Create a Force.com Site to Open Your Flow for Unauthenticated Access

Now we will create a site to open the flow for unauthenticated access.

1. Click **Setup**.
2. In the Quick Find box, type **Sites**.
3. Clicks on the **New** button.
4. Fill the details as per the screenshot below:
5. Click **Save**.

The screenshot shows the 'Site Edit' screen for creating a new site. The form includes the following fields:

- Site Label:** Survey
- Site Name:** Survey
- Site Description:** (empty)
- Site Contact:** Rakesh Gupta
- Default Record Owner:** Rakesh Gupta
- Default Web Address:** http://katihar-developer-edition.gus.force.com/ survey
- Active:** checked
- Active Site Home Page:** Survey
- Inactive Site Home Page:** InMaintenance
- Site Template:** SiteTemplate
- Site Robots.txt:** (empty)
- Site Favorite Icon:** (empty)
- Analytics Tracking Code:** (empty)
- URL Rewriter Class:** (empty)
- Enable Feeds:** unchecked
- Clickjack Protection Level:** Allow framing by the same origin only (Recommended)
- Require Secure Connections (HTTPS):** checked
- Lightning Features for Guest Users:** checked
- Upgrade all requests to HTTPS:** checked
- Enable Content Sniffing Protection:** checked
- Enable Browser Cross Site Scripting Protection:** checked
- Referrer URL Protection:** checked
- Guest Access to the Payments API:** unchecked

Under site, **Public Access Settings** make sure that guest users have **Create** access on **Survey Result** object and **Edit** on the **fields**.
